- Possibility to enter in KEET db the firms informations from Kosgeb db ?
- Should we allow the auditor to update this data ?

# KEET transmission

- We commonly decided after study tour :
  - AERE implement KEET on its server in php/mysql from agreed specifications
  - Cetiat tests it during audit phase
  - Experts, Cetiat and Kosgeb help and advise AERE for changes
  - Kosgeb will get the final tool and install it on its server
- This last task should begin in a few months :  
is it still possible ?
